the mobitec spirit

Since 1990, Mobitec has been synonymous with the creation of moments of well-being. These are not just brief instances; they are precious snapshots of life.

Shared laughter that echoes around a dining table, the spark of inspiration in seminars, the contentment of savoring a meal at a favorite restaurant — we are proud to be a part of these experiences. Our commitment lies in crafting high-quality seating and tables that do not just occupy a space but enhance it, ensuring they perfectly complement the ambiance of any setting.

At Mobitec, we find the ideal balance between design, comfort, customizability, and durability, because we believe well-being is multifaceted: It is about the aesthetic appeal and the feeling it evokes. From our foundation, the human element has been central to Mobitec's spirit.

We prioritize well-being at every stage of our process — not just for our customers, but extending that care to our teams, partners, and suppliers.

This holistic approach to well-being is what sets Mobitec apart, ensuring that every interaction is meaningful, and every moment shared is a testament to our commitment to quality, comfort, and the collective happiness of our community."

— Anne Rom & Marie Claeys

Mobitec is a Belgian family business producing tables and seats of high durability and comfort, which are distinguished by their design and great customizability. Our furniture can be found in homes, restaurants, hotels, offices, and care institutions across Europe.

With our distribution partners, we have the privilege of furnishing prestigious locations like the main restaurant at Roland Garros, the offices of the European Commission, a residence of Omar Sy and senior residences affiliated with the Korian Group.

Our offices are situated in Eupen, and our three production sites are located in Poland. The company employs about 700 people. We produce on demand, with no minimum order quantity, and we are focused on the personalization of the products. We produce about 200.000 chairs and 15.000 tables yearly. Our products are sold in more than 10 European countries, through a network of distributors and agents.

DESIGN

& quality

In the Mobitec design department, four creative minds lend their signature to our products to form an identity that seamlessly combines aesthetics, comfort, personalization and our originality. Together, they collaborate seamlessly to develop the best products for the market, leveraging the expertise and savoir-faire of our colleagues in Poland. Dominique Amodei, a cornerstone of the Mobitec family since 1993, is the luminary behind the Design team. For him, impeccable design is paramount.

*"A chair can never be too heavy,
nor uncomfortable. However,
it must have character and ensure
durability. As for the aspect of being
beautiful or not,
that's a matter of taste."*

From the acquisition of raw materials and drying our wood to the final assembly, we handle every step of the manufacturing process at our three production sites. Environmental protection always remains one of our top priorities.

Strategically located within a 50 km radius in Poland, our three facilities each play a unique role:

- In **Mieroszów**, we begin with wood procurement, followed by drying it ourselves to control the quality. After this, we start the machining, assembly, and finishing of frames.
- **Jaworzyna** specializes in the production of tables and metal frames for chairs and tables.
- **Dzierżoniów** serves as the center for sewing and upholstery, doubling as a logistics hub for all our deliveries.

SUSTAINABILITY *strategy*

At Mobitec, our commitment to sustainability goes beyond environmental concerns; it encompasses a profound respect for people and the enduring prosperity of our company.

We believe in thriving over the long term, creating positive impacts on both the environment and society. Within this spirit, we've identified five pivotal areas where, as furniture manufacturers, we can make a meaningful difference for generations to come.

1. Perennity and well-being of all

As responsible economic actors, we lead by example, ensuring the well-being, development, and job security of our teams. Our goals for 2024 include having 80% of employees recommend Mobitec as an excellent workplace, achieving zero work-related sickness, and attaining an 80% success rate for our internal projects.

2. Eco-design and circularity

We embrace a new economic model by placing eco-design at the core of our strategy. Our commitment extends to providing circular solutions and adopting eco-friendly practices for our products. By 2025, our objectives include eco-designing all new products and introducing removable covers for the top 10 models, reducing our environmental footprint and production waste.

3. Climate

Recognizing the undeniable impact of human-caused greenhouse gas emissions on global warming. By 2030, our goal is to halve our CO2 emissions, contributing to the global effort to combat climate change.

4. Our fight against deforestation

Forests, vital for biodiversity and carbon absorption, face the threat of abusive deforestation. Mobitec is committed to reducing our impact on deforestation and promoting initiatives for sustainable forest management. We recognize the pivotal role forests play in maintaining ecological balance, and our actions reflect our dedication to preserving these vital ecosystems.

For us, sustainability is not just a goal; it's a journey towards a future where environmental consciousness, social responsibility, and economic viability merge. Together with our valued customers and suppliers, we forge ahead, creating a positive impact that echoes through the realms of furniture production and beyond.

SUCCESS *stories*

Residentie Vroenhof - Nobama:

Located next to the park garden and connected to the Montfortanen Monastery (Houthem-Valkenburg), you will find Residence Vroenhof. This unique location offers a safe and welcoming environment for seniors seeking care and support. Here, everything revolves around a life filled with comfort, care, and a sense of connection.

Het Laar - Laarstede, BiermanHenket:

Laarstede is a residential care facility for elderly individuals with dementia who require care. The building has been designed with a flexible structure, allowing the apartments to be rented out in the future without a care function. All apartments and communal spaces feature outdoor areas, enabling residents to access the outdoors barrier-free, with views of the surrounding greenery.

6

Reha Zentrum Oldenburg:

The Oldenburg Rehabilitation Center specializes in post-acute care and brings together four clinics under one roof. The facility is designed to be spacious and welcoming, providing space for rest and recovery outside of the therapy schedule.

MONOCHROME

Dive into our 8 unicolored worlds

Give your interior a distinctive character.
Whether soft and subtle or bold and contrasting –
"Monochrome" offers endless possibilities to create
vibrant and unique spaces.
Make a statement that inspires and craft an
atmosphere that reflects your personality.

your story,
vibrant
tones!

FINISHINGS

Within our textile assortments, we feature almost 40 collections of upholstery fabrics, each offering more than 10 color options, ensuring versatility and compliance with project standards and requirements. No matter the specifications of your project, we'll have a fabric, faux-leather or leather that perfectly suits it.

If you don't find what you're looking for in our fabric collections, we also work with your own fabrics. For more information on this, please contact our sales department.

In our finishings collection, you'll also find a spectrum of possibilities, from more than 20 different metal finishes that exude modernity and elegance to over 50 wood tones that offer warmth and sophistication. Our Fenix finishes, available in more than 5 shades, offer durability and versatility, perfect for high-traffic areas where both style and functionality are paramount.

Each finish tells a story, inviting you to explore different facets of your personality and design aesthetic. Whether you prefer the timeless charm of natural wood or the contemporary allure of matte black, our finishings collection has something for everyone.

Moreover, we offer various types of gliders to perfectly adapt to your floor type, ensuring our products harmonize seamlessly with your space, whether at home or in your project. You just have to choose the appropriate glider for your floor type. Do you have tile, natural stone, or a hard floor? Opt for plastic gliders.

For carpeted floors, metal gliders are ideal. And if you have hardwood flooring, felt gliders prevent scratches. Our gliders are discreetly offered in either white or dark brown, depending on the color of your chair's base.

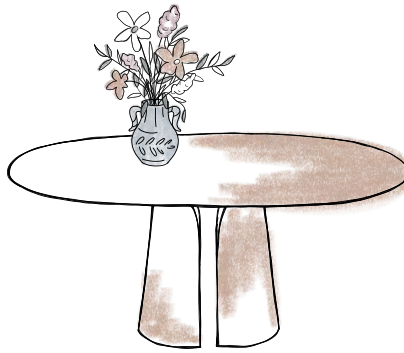

At Mobitec, we believe that furniture is more than just objects; they're an expression of who we are and how we live. That's why we're proud to offer a finishings collection that empowers you to create spaces that inspire, delight, and comfort. So go ahead, explore our finishings collection, and embark on a journey of self-expression and well-being.

For more information and to explore our entire finishings collection, please refer to our 2025 Finishings Catalog, available in print or online **here** :

Valencia & Aquaclean

Two of our most suitable fabric options for the care sector are Valencia and our Aquaclean fabrics, thanks to their exceptional ease of maintenance and effortless cleaning.

thank you

*We would be delighted to collaborate with you in the
future to transform also your projects into
places of well-being.*
