EVENT

INTERPRETATION

SERVICE

The technology we use is...

-  the future streaming software of events
-  crystal clear stereo or mono audio
-  choose your preferred language at any time
-  by mobile internet connection or local WiFi infrastructures

The main purpose of this software is to let you feel independent during events. There is no app needed! By using a simple link, you and all the other visitors are able to choose individually, in which language the streamed interpretation will be followed. You will get the live-feeling – even while having a coffee somewhere at the venue.

ALWAYS CONNECTED

All you need is your mobile internet connection or to log in to the WiFi of the event, plug your earphones into your mobile device and open the interpretation link – that's it. By clicking on your screen you are able to switch and choose between all available languages.

Multi-channel live translations out of your pocket!

auXala

Please bring your fully loaded mobile device so you can use the event interpretation service of Salzburg Congress. The phone battery is typically capable of a full day of internet connection, but we can also supply power banks on a rental basis, when you need additional power.

When you need additional information, please do not hesitate to contact us:
